Blogs, Bloggers, and Blogging: Finding, Sharing, and Creating Information in the World of Social Software
Just What is Social Software
Wikipedia Says

- **Social software** enables people to rendezvous, connect or collaborate through **computer-mediated communication** and to form **online communities**.

---

Social software

Social software enables people to rendezvous, connect or collaborate through computer-mediated communication and to form online communities. Broadly conceived, the term could encompass older media such as mailing lists and Usenet, but some would restrict its meaning to more recent software genres such as blogs and wikis. Others suggest that the term social software is best used not to refer to any single type of software, but rather to the use of two or more modalities of computer-mediated communication to engage in community formation. In this view, people form online communities by combining one-to-one (e.g., email and instant messaging), one-to-many (Web pages and blogs), and many-to-many (Facebook) communication modes. In many online communities, real-life meetings become part of the communication repertoire. The more specific term collaborative software applies to cooperative work systems.

On Change, Library 2.0, and ALA

Posted on 02/28/2006 at 08:10:32 PM by Michael Stephens

A few weeks ago, Jenny and I found ourselves at a meeting at ALA Headquarters talking about Web 2.0, learning, and Library 2.0 initiatives with some of the ALA division heads, Mary Ghikas, Senior Associate Executive Director, and the Otter Group’s Kathleen Gilroy. As a result of that meeting (and some forward-thinking continuing-education interest and work on the part of Mary Ghikas and the Otter Group), Jenny and I are authoring content for, as well facilitating, an online prototype “Learning 2.0” program that ALA will launch this spring.

“Learning 2.0” course aspects, highlighted in this graphic, include: 50 aggregators for people to collect and read blogs and podcasts; blogs for network portals and individual contributors; iTunes for aggregating podcasts; and...

Library 2.0

- Library 2.0? **Sarah Houghton** (LiB) said that Library 2.0 is...
  
  ...making your library’s space (virtual and physical) more interactive, collaborative, and driven by community needs...The basic drive is to get people back into the library by making the library relevant to what they want and need in their daily lives...to make the library a destination and not an afterthought.
So... Blogs

A blog is a website in which items are posted on a regular basis and displayed in reverse chronological order. The term blog is a shortened form of web log. Authoring a blog, maintaining a blog or adding an article to an existing blog is called "blogging". Individual articles on a blog are called "blog posts", "posts" or "entries". A person who posts these entries is called a "blogger". A blog comprises text, hyperlinks, images, and links to other web pages and to video, audio and other files. Blogs use a conversational style of documentation. Often blogs focus on a particular "area of interest", such as Washington, D.C. political goings-on. Some blogs discuss personal experiences.

Blogs can be hosted by dedicated blog hosting services, or they can be run using blog software on regular web hosting services. In the early 21st Century, blogging has quickly emerged as a popular and important means of communication, affecting public opinion and mass media around the world.
Why Should You Care About Blogs?
Why Should You Care About Blogs?

- Helps you stay informed about subjects you care about
- Get current, unfiltered news & information – That could be slanted by the blog author
- Unlike listservs, won’t clog up your email – Just you newsreader
- No Spam – unless one of the blogs you read is supported by ads

Medical Librarian Blogs

Previously I asked the question, "What would you like to see here?" and I got many responses. I am thankful for all of the responses I have received. It was nice to hear your thoughts suggestions.

One comment asked for more medical library related blogs.

"On your blogroll, I would like to see a list of blogs maintained by medical librarians (as opposed to those maintained by librarians in fields other than the medical). Yours and UBC Google Scholar Blog are the only medical-library specific blogs that I know of. I

CLINICAL QUERIES NOW AVAILABLE IN OVID CINAHL AND OVID PSYCINFO

As of very recently (Nov 21, 2005?), the clinical queries that were originally available in MEDLINE, and then later in EMBASE, have now become available in CINAHL and PsycInfo.

In CINAHL, queries are available for the following domains: Etiology, Prognosis, Qualitative, Reviews and Treatment.

See http://hiru.mcmaster.ca/hedges/All-CINAHL.htm for the strategies.

In PsycInfo, queries are available for these domains: Treatment, Reviews and Qualitative.

See http://hiru.mcmaster.ca/hedges/All-PsycINFO.htm for the strategies.

There are six levels of query for each domain: 1 term high sensitivity, 1 term high specificity, 1 term min difference, 2 terms high sensitivity, 2 terms high specificity and 2 terms min difference.
Truncation in PubMed

A truncation search feature provides the ability to search for variant words or spellings. Sometimes called a wildcard, this is a standard feature found on many search engines; however, different search engines may use a different truncation or wild card symbol. New searchers may overlook this feature, while more experienced users may forget which truncation symbol is used on different search engines. But for those searchers trying to increase their searching knowledge and expertise, truncation can be a useful, though tricky feature. This article discusses the specific consequences of using truncation in PubMed:

How Do You Blog? Guy and Kathleen

In LIS Weblogs Rule!

Kathleen at Otter Group posts about how Guy Kawasaki writes a post and her own methods. This is thoughtful and includes having someone "edit" the post for clarity etc. I'm reminded of our editorial process at TechSource. I've sent TTW posts/essays to trusted colleagues to make sure the wording, etc is right. It's always good to sleep on a bigger post too and re-read it in the morning.

http://www.ottergroup.com/blog/archives/2006/2/19/1772355.html

Note: I believe this method is very useful for the essay style posts many bloggers write, but quick pointers and notes are just that: quicker little posts that might not need the editorial eyes.

The Stuff Happening at My Place of Work

Mar 2, 2006 - Show original item

I won't say much more about it, but I want to reassure those who have asked that I'll be fine, and even My Place Of Work will be fine—we'll manage, with many new, good ideas. Things happen, life has its ups and downs!

I'm actually quite busy at MPOW these days, since we're testing new search engines for MPOW. Replacing what we have will help MPOW—though not completely address all of the search issues I've discussed in the past. There's still a usability gulf with searching any directory service—and that includes OPACs—because you're searching the metadata, not the object itself. That's one reason that I have emphasized MPOW's newsletter so much in the last four years. Now it has well over 30,000 subscribers—probably much higher than that.

As a search tool, I have been the first and the most emphatic to say MPOW doesn't work well, and I've explained very clearly why that is. I even have a flowchart for how it should work. Yet as an announcement service, it rocks.

Meanwhile, I'm very, very busy... whew. Search engines, consultants, programmers, vendors, plus the weekly publishing sh*tick, plus getting our annual user survey done, plus getting out our annual summer reading collection, plus tweaking the newsletter templates, plus a gazillion call-backs... whew!
Information Flow: Model #1

Information:
- Blogs
- News Sites
- Databases

You → Checking for Updates

Model #2: E-Mail Alerting (flip the arrows)
Information Flow: Model #3 (RSS)

You

Reader pings site (feed) for updates

RSS READER

Reader translates XML into readable format for user: titles, authors, dates, content*, link back to original source

Information:
- Blogs
- News Sites
- Databases

XML

New content (since last check) pulled into reader

*If present: first sentence, summary, complete article
What is RSS?

- Rich Site Summary
- Really Simple Syndication
- RDF Site Summary
- RSS .9, .91, .92, 1.0, 2.0
  - ATOM

WEBFEEDS!!

- Function vs. "techspeak"
- Concept vs. version/flavor
Conceptual Definition of Webfeeds

- **Information** repackaged by provider / creator to give the **user** more **control** over **delivery**.

- Frequently updated / monitored sites
  - Blogs, news sites, etc.

- Packaged as **XML**
Q: How do you know if a site has feeds?

Places to check on the site:
- “Utility” spaces on the homepage: top, margins, bottom
- Does the site have a news/press release section?
- Sitemap; Site Search
Using a (RSS) Reader - summary

- Subscribe to the sites (feeds) you want to monitor
- Read the new content at your leisure
  - USE THE INFORMATION – share, apply
- Group feeds into categories, unsubscribe, etc.

- Reader does the rest…checks for updates, highlights **new content**, converts XML to user-readable content
- Autodiscovery: some readers detect that you’re browsing a page/site with feeds, and allow you to add the feeds in 1-2 clicks
Subscribing to a Feed in 4 clicks

1. Right-click to copy feed
2. Reader: “Add”
3. Paste feedlink
4. “Subscribe”
   1. Select Category
   2. “Subscribe”
The Pros & Cons of Readers/Webfeeds

- User control of information content/delivery
  - Simple opt in/out mechanism
    - No passwords, subscription info
  - Customization
    - Your own “personal newspaper”
- It’s not e-mail (no spam, yet)
  - Not universally offered
  - No standards
  - “Information Overload”
    - Backblog
  - Readers still WIP’s
Coming Soon: PubMed

Figure 1: RSS Feed Option on PubMed's "Send to" Menu

- Click the XML icon below. On the new window, copy the URL in the browser Address box and paste it into your RSS reader. In some cases, you can do this by dragging and dropping the XML icon.
- RSS feeds not accessed for 6 months will be automatically deleted.

Figure 3: PubMed's RSS Page
As Library Professionals...

- Become familiar with RSS/webfeeds
  - Concept & Function
- Set up reader and start reading
- Talk to vendors and users

Public Services
- Educating users (webpages, training, etc.)
- Identifying relevant feeds for you/users
- Are there PS needs that webfeeds could fill?

Information Technology
- Working with PS to fill those needs
- Are other libraries creating webfeed-based services we should consider?
Creating A Library Blog

- Why Create a Blog for Your Library?
  - To communicate with your users
  - To communicate with library staff
  - To communicate with yourself
Public Blogs for User Communication

- Library & Topical News
- Announce New Services
- Recent Acquisitions List
- Book/Movie/Web Site Recommendations
- Book Discussions
- Local Events Calendar
- Recommended Research Sources
Internal Blogs for Staff
Communication

- Announcements for Staff
- Knowledge Management
  - Frequently asked reference questions
  - Password archive
- Project Management
  - Forum for collaboration
  - Progress reports
Benefits of Library Blogs

- Easy – no HTML knowledge required
- Inexpensive
- May be seen as innovative
- Attracts younger users
- Allow user feedback through comments
- Can be career booster for bloggers
Drawbacks of Library Blogs

- Requires staff time commitment
  - Training
  - Set-up
  - Posting

- May need to educate people about blogs
  - Users
  - Staff
Steps For Creating A Library Blog

- Consider purpose & audience
- Choose blog software
- Develop blogging policies
- Create a template for the blog
- Consider staffing issues
- Post content
- Market the blog
Consider Purpose & Audience

- Determine type of content you wish to share
  - Library & Topical News
  - Announce New Services
  - Recent Acquisitions List
  - Book/Movie/Web Site Recommendations
  - Book Discussions
  - Local Events Calendar
  - Recommended Research Sources
  - Other??
Consider Purpose & Audience

- Decide upon a target audience
  - General community users
  - Doctors
  - Nurses
  - Students / faculty
  - Employees
Welcome

WordPress is a state-of-the-art semantic personal publishing platform with a focus on aesthetics, web standards, and usability. What a mouthful. WordPress is both free and priceless at the same time.

More simply, WordPress is what you use when you want to work with your blogging software, not fight it.

To get started with WordPress, set it up on a web host for the most flexibility or get a free account on WordPress.com.
A powerful, hosted weblogging service.
You can publish anything instantly. Be the sole author, or share a
weblog with friends, family, or colleagues. Post your vacation
photos, comment on the news, keep a private journal. How you
use TypePad is up to you.
